It is also only Tourism Studies Departments in the country assisted by the University Grants Commission (UGC) at DRS – I1 level of SAP.

The DTS has repeated the practice of placing all the 2014-16 batch students. There were around 18 well reputed tourism and travel companies have been visited the Campus during December 2015 and January 2016. A brief on World Tourism Day 2015: The UN World Tourism Organization (UNWTO) observes the 27th Sept every year as the World Tourism Day. It is a day wherein the value of Tourism and significance of the industry is globally linked to the economy, society and culture. The aim of the day is to raise awareness that tourism is vital to the international community and to show how it affects social, cultural, political and economic values worldwide. Each year has a particular theme. With more than a billion tourists now travelling the world each year, the theme for 2015 explores the potential of tourism for socio-economic development.

In his message to the world, on the occasion of the World Tourism Day 2015, the UN Secretary-General, Ban Ki-moon, said that, "With more than one billion international tourists now traveling the world each year, tourism has become a powerful and transformative force that is making a genuine difference in the lives of millions of people.

The potential of tourism for sustainable development is considerable. As one of the world's leading employment sectors, tourism provides important livelihood opportunities, helping to alleviate poverty and drive inclusive development.

As tourism revolves around encounters between different peoples, the sector can foster multicultural understanding and raise awareness on the need to preserve cultural and natural heritage.

Let us work together to maximize the immense potential of tourism to drive inclusive economic growth, protect the environment and promote sustainable development and a life of dignity for all." In the above said context, the Department of Tourism Studies, Pondicherry University organised various events as per the agenda given above. The deliberation of each event is as given below.

5.5.2 DEPARTMENT OF MICROBIOLOGY**Introduction**

Microbes are playing important role in the bioprocess of all living things and maintain homeostasis of the universe. Without microbes, one cannot imagine such a biologically balanced and diverse universe; rather our earth would have placed as a barren planet. As the microbial activities are so diverse, the microbiology programme is a multidisciplinary subject, which will have the roots of life science, environmental science, and engineering. Traditional microbiology is considered to be an important area of study in biology since it has enormous potential and vast scope in fermentation, bioremediation and biomedical technology. But the recent developments from human microbiome project, metagenomics and microbial genome projects has expanded its scope and potential in the next generation drug design, molecular pathogenesis, phylogeography, production of smart biomolecules, etc. Modern Microbiology has expanded its roots in genome technology, nanobiotechnology, green energy (biofuel) technology, bioelectronics etc. Considering recent innovations and rapid growth of microbiological approaches and applications in human and environmental sustainability, the M.Sc. Microbiology curricula is designed to enlighten the students in basics of Microbiology to recent developments. The Ph.D. Microbiology was started during July 2013 under Department of Microbiology.

Department of Ocean Studies and Marine Biology was established in the year 2000 as a Centre of Ocean and Island Studies at Port Blair and shortly upgraded as a Department in the year 2004. This Department at present is located at Brookshabad, which eight kms away from the Port Blair, the picturesque capital city of the Andaman and Nicobar Islands in a sprawling campus of its own. The Department has modern infrastructural facilities, well equipped with advanced instruments and laboratories for both the academics and research activities with external funding from agencies like UGC, DST and MoES etc.

The Department is well poised to train students by imparting education and field based practical training in the arena of Marine Biological Sciences. Students to the Post Graduate and Ph. D. programs are admitted on the basis of the rank obtained by All India Entrance Examination conducted by the Pondicherry University at different centers in the country. The students enrolled for the Master degree are offered a studentship of Rs. 1000 per month. All the Ph. D. Scholars too avail research fellowships from the Pondicherry University, UGC, CSIR, Rajiv Gandhi National Fellowship, Maulana Azad National Fellowship and several other funding agencies like UGC, DST, MoES etc.

Thrust Areas : The Program is primarily focused at building trained manpower with skills required to cater to the need in the arena of Marine Biology. The Department has the mandate of exploring the potential of marine living and nonliving resources and their application, developing sustainable management strategy for the resources, creating database on all the oceanographic components involving biological, chemical, physical and geological aspects of the Andaman Sea preferentially.

The Department conducts M. Sc. and Ph. D. Program in Marine Biology and it's strategic location at Port Blair in close proximity with the Andaman Sea provides unique opportunity for the students and researchers to get extensive exposure to a vivid from of marine environmental conditions comprising estuarine, mangrove, Island and marine ecosystems.

5.5.7 CENTRE FOR BIOINFORMATICS

Introduction

The Centre for Bioinformatics in Pondicherry University was started as Sub Distributed Information Centre (Sub-DIC) of the Department of Biotechnology (DBT), Govt. of India in 1991. The mandate of the Centre is to train manpower and conduct research in various areas of Bioinformatics. Recognizing the progress made by the Centre, DBT upgraded the Centre to a full Centre level in 2002. The Centre has been identified as a Centre of Excellence for Research and Training in the field of Bioinformatics by the Department of Information Technology (DIT), Govt. of India, in 2007. Details of the center are available in www.bicpu.edu.in and www.pondiuni.edu.in

There are 11 faculty members, 1 information officer, three senior technical assistants and one computer assistant. More than 50 research scholars and 100 students are enrolled in the centre. Reflecting inter-disciplinary nature the fields of expertise of faculty are quite diverse. It ranges from mathematical modeling of biological systems, sequence analysis, biophysics, structural biology, bimolecular crystal structures and computer science.

From the time of its inception, the Centre has taken up several research projects and has been offering modular courses in Bioinformatics. The centre started offering PG diploma courses in Bioinformatics during the early days of its institution. Subsequently in 2007, the Centre started offering "M.Sc. program in Bioinformatics" by the support extended by University Grants Commission (UGC) under the scheme of "Innovative Programme - Teaching & Research in Interdisciplinary and Emerging Areas". The Centre started Ph.D. Programme in 2009. The Centre started an innovative M.Sc. program in Computational Biology fully funded by DBT in a network mode with Madurai Kamaraj University, Madurai and Anna University, Chennai in 2010. This programme is first of its kind in the country and upgraded to M.Tech program in Computational Biology from 2014 in collaboration with Anna University, Chennai.

In 2014, the UGC recognized the center for special funding under UGC SAP DRS-I program. The Centre has signed an MoU with Institute of Bioinformatics (IoB), Bangalore and University of Sienna, Italy for collaborative research and Ph.D. guidance. Under MoU the Ph.D. students of the center can visit these labs for collaborative research.

All students, research scholars and faculty are provided with round-the-clock computing facilities. The Centre has established a separate wet lab facility with sophisticated equipments. Most of the past students were placed in various leading research institutions and industries. Many of them are pursuing higher studies abroad.

In the past few years, Centre has taken up research activities in the areas of sequence analysis, molecular modeling, structural biology, database development etc., and several papers have been published in peer-reviewed International and National Journals. The faculty and students have received projects/fellowships from various funding agencies like Department of Biotechnology, Department of Information Technology, University Grants Commission, Council of Scientific and Industrial Research-JRF/SRF, Department of Science and Technology, Bioinformatics National Certificate (BINC), DST-Innovation in Science pursuit for Inspired Research (INSPIRE) and Rajiv Gandhi National Fellowship.

The University supported the Centre with a separate state of art building of about 35000 sqft with complete UPS power back up for all rooms. The building is having 3 computer labs, 13 Faculty rooms, 13 individual research labs for faculty, common wet lab, common instrument room, Library, class rooms and a seminar hall.

5.6.1 DEPARTMENT OF ENGLISH

Introduction

The Department of English, one of the oldest Departments of the University, was established on 1st December, 1986, and since its inception, the Department has been the hub of teaching and research activity, attracting a cross-section of students and research scholars from all over the country. It has established itself as a stronghold of Comparative Literature, teaching Comparative Literary Theory and fostering Comparative Literary Studies between English and other literatures. In recent years, Translation Studies, Cultural Studies, Ecocritical Studies, Dalit Studies and Disability Studies too have emerged as thrust areas, inspiring inter-disciplinary and intra-disciplinary insights among faculty and students alike.

At the Postgraduate level, the Department of English offers courses in poetry, drama, prose and fiction of canonical British literature, American Literature, and other National literatures thus offering a good training for UGC-NET aspirants, and all those keen to acquaint themselves with the representative texts. A strong theoretical foundation is laid with two Literary Theory courses spread over two semesters. The Department also offers courses in ELT and Research Methodology which are application-oriented. A basic course devised

as “Language through Literature” offers students an orientation to the formal study of English language and literary appreciation.

A high-point of our M.A. Programme is the research project that encourages individual initiative and self-study on the part of the students. Emerging areas of study such as Media Studies, Postcolonial Studies, and Gender Studies along with an array of specialized electives make for an M.A. programme---a perfect blend of the traditional and the modern. A PG Diploma course on Professional Communication in English (PGDPCE) has been offered as an Add-on Evening programme to cater to the demands of the other Department Students and job-goers on and off the campus.

The faculty members of the Department of English also engage Functional English classes for the fast-mushrooming integrated courses in various other allied disciplines. This is done with diligence and commitment with a view to fostering efficiency and skill in the use of the language. As the Department just celebrated its Silver Jubilee Year, it has set a distinct path to get even better in its academic standards and commitment to the community and nation at large. The Department takes pride in being one of the best Departments for high quality degree programs, affordability, and career prospects.

5.6.2 DEPARTMENT OF FRENCH**Introduction**

The Department of French has strived to maintain a high standard in academics and research. Created in 1987, the Department of French aims to promote French & Francophone Studies as well as Translation Studies in India at the Post-Graduate and Doctorate levels, thus enhancing the historical links Puducherry has had with France, and renewing the bilateral ties and cultural dialogues with the Francophone countries. The French Dept. has a 100% placement ; its alumni are well placed, mostly in the teaching profession, or in the French Embassy at New Delhi, or as Language Specialists in reputed companies of the corporate world such as Renault - Nissan, Cognizant, TCS, and Infosys, or banks like HSBC, Société Générale, and Deutsche Bank. With M.O.U.s signed with many Universities in France, the exchange of students and Faculty has been concretized. Under the Study India Programme too, French students come to pursue studies at our University, and the French Dept. acts as a liaison between them and the Depts where they follow courses.

Every year, there is an increasing demand for admission to M.A. French and Basic French courses offered by the Dept..

This Department of French of Pondicherry University is one of the first in French to get the SAP; this Project has now entered its Phase-II and was granted one Crore by the UGC.

Thrust Areas : French Language, Linguistics, Civilization, Translation & Interpretation, French & Francophone Literatures, Teaching of French as a Foreign Language.

9.3 CENTRAL INSTRUMENTATION FACILITY

Introduction

Excellence in teaching and research by Science Schools need state-of-the-art sophisticated equipments, various workshops and support facilities. These equipments and facilities help the faculty, research scholars and students to carry out globally competitive R & D in basic and applied sciences. Since individual researchers may not be able to generate huge research funds for the research instruments, in the year 1992 University Science Instrumentation Centre later renamed as Central Instrumentation Facility (CIF) was started in Pondicherry University with a mission to enrich the resources on a shared basis for promoting R and D with the following objectives.

1. To strengthen technological infrastructure to carry out advanced research in various science disciplines under one roof and make their services available to academic schools and departments.
2. To provide guidance for acquisition of data and train personnel in operation and maintenance of Sophisticated Instruments.
3. To organize short-term courses/workshops on the use and application of various spectroscopic and analytical techniques for students, teachers and technical personnel from our University, affiliated institutions, universities and industry in the region.

It was established as University Science Instrumentation Centre (USIC in the year 1997, and later absorbed as one of the centres by the University. In the year 2006, USIC was renamed as Central Instrumentation Facility (CIF) and attached to the School of Physical, Chemical and Applied Sciences. It is governed by the Management Advisory Committee consisting of Vice-Chancellor as Chairman, Deans of all Science Schools, Heads of all Science Departments, external Experts as members and the Centre Head as the Member Secretary.

The Electronic service requirements of major scientific instruments and the mechanical fabrication works for customary designs required for the scientific research is carried out in the Central Instrumentation Facility.

Centre Head (i/c) : Dr. Bala Manimaran

The Sophisticated Analytical Instruments available in the Facility

The Centre has many valuable sophisticated Instruments such as Vibrating Sample Magnetometer, Spectrophotometers covering the UV, VIS, NIR, Mid-IR and Far-IR regions, Spectrofluorimeter, Scanning Electron Microscope, Wavelength dispersive X-Ray Fluorescence Spectrometer, Broadband dielectric spectrometer, Thermal Analysis Instruments and Nuclear magnetic Resonance spectrometer etc., The facility also has micromill for preparation of sub-micro and Nano Particles of samples and a Gamma irradiation source for studying the effects of radiation exposure on Samples.

All the Science Departments of the University have utilized the analytical facility for furthering their teaching and research activities. Neighboring educational institutions - both affiliated and non affiliated have also utilized the facility extensively. Other Universities in the region and reputed research institutions such as Anna University, IIT-M, IISC, BARC, CSIR-Chennai etc have also used the facility to analyze their samples.

Programmes Organized during 2015-16

Educational visits by affiliated and non affiliated institutions were encouraged. Several students / research scholars and faculty members of these educational institutions visited and benefited by attending the demonstration of the working of the analytical instruments. As part of Science day celebrations, CIF organized a demonstration of the scientific instruments to School and College students on 28th February 2016.

The centre is playing an active role in the organization and conduct of the Certificate course in Advanced analytical instruments (add - on course) offered for the research scholars of the Science departments of the University.

In Progress

The following advanced analytical instruments has been received and is in the process of installation:

1	High resolution Transmission Electron Microscope (HR-TEM) Facility with sample preparation equipments
2	Fluorescence-activated cell sorter (FACS) - Under DST-PURSE

9.4 HEALTH CENTRE

The University Dispensary started functioning from August 1989 with a view to give medical cover to university students, staff and their dependants. It is rendering medical aid to Teaching, Non-Teaching staff and their dependants and Students.

The University Dispensary has been converted into Health Centre from December 2002 with in-patient facility and with an objective to provide investigation and radiology facility to the university employees, their dependants and students. The University Health Centre functions from 9.30 A.M to 5.30 P.M on all days in a week with following existing staff.

The Health centre is situated near the Residential and Hospital areas. It is handling all routine out-patients. Medical examinations, injections, dressing and minor surgical procedure are carried out here. The necessary medicines are issued free of cost.

The Health centre is equipped with all kinds of emergency medicines and injections. Emergency cases are attended to and after providing first line of treatment they are referred to Government Hospital or JIPMER for further treatment and management.

For in-patients requiring, major surgical intervention and for expert opinion, patients are referred to Government Hospital, Maternity Hospital or JIPMER, Pondicherry. The necessary laboratory investigations are carried out by referring them to Government Hospital or private laboratories and follow up of the cases are done by the University Medical Officers.

The medical examination of the University employees at the time of appointment is carried out by the University Medical Officers and medical examination of the students is also carried out whenever it is necessary.

Medicines are procured from Government sector companies and medicines which are not available in Government sector are procured from private sector by calling quotations through purchase and store section.

Since 4th September 2006, the University Authority has set up a section for Pondicherry Institute of Medical sciences (PIMS) in the Health Centre of Pondicherry University. PIMS is a private institute and provides medical facilities round the clock to the University students, staff and their dependants. The Centre has laboratory facilities too. The patients who attend there also get free medicines from the Health Centre Pondicherry University, Puducherry, from 9.30 A.M to 5.30 P.M as per direction of the University Authority.
